

CALFIRE

The Fireside Collection

- 2013/14 -

www.calfire.com

Welcome to the 2013/14 CALFIRE FIRESIDE COLLECTION.

CALFIRE is a long established family group of companies with a strong reputation for quality products and service throughout the heating and fireplace industry. Friendly and approachable, CALFIRE prides itself on customer service.

In November 2010 CALFIRE took over the supply and distribution of the exceptional Kingsworthy Foundry range of fireside accessories for log and coal burning fires. As a result CALFIRE now offer the most comprehensive range of quality cast iron firebacks, firebaskets, swansnest baskets, ducksnest baskets, firedogs and reeded panels together with superb quality British Made steel firebaskets and blacksmith produced firedogs. CALFIRE are grateful to Kingsworthy Foundry for allowing them to use their logo in this years catalogue to show continuity of supply.

CALFIRE are unique within the fireplace and heating industry with their extensive product related ranges. In addition to offering a most comprehensive selection of Fireside Accessories they are also:

- The official UK distributor for StoveBright™ High-Temperature Paint, selling the product in aerosol and touch-up forms to retailers as well as in bulk liquid form to many of the leading UK traditional Woodburning Stove Manufacturers.
- The official UK distributor for Ecofans®. These products sit on the top of woodburning stoves and assist in distributing the stoves heat without using mains or battery power. Improved warm air circulation results in greater comfort and less fuel consumption. Ecofans® are a great favourite with the countries many Narrow Boat enthusiasts. Visit the UK specific Ecofan® website at www.ecofan.co.uk for full information.
- A major supplier of Replacement Stove Glass offering Ceramic Glass panels, Borofloat Strips as well as Mica. All popular sizes are available 'off the shelf' with in house facilities available for cutting your special requirements.

CALFIRE supply to trade accounts all over the Country, however members of the public are welcome to browse through this catalogue or visit the companies website at www.calfire.com. Contact with the company can be made through an email facility where product information or details of local stockists can be ascertained.

Alternatively contact your stockist or telephone our friendly staff on **01691 772922**

Please note that specified finishes such as Brass, Antique, Chrome, Satin Nickel, Pewter, Copper, Copper Bronze & Steel relate to the colour only and not the material.

 Throughout pages 3-71 of this catalogue, British Manufactured items are clearly indicated with the union flag for your information.

Due to studio lighting and printing inks, the colours shown in this catalogue may differ slightly from those of the actual products. Any dimensions or weights given are approximate and should only be used as a guide. Key to dimensions: H=Height; D=Depth; W=Width; L=Length. Calfire's aim is one of constant improvement and the company reserves the right to change specifications without written notice. Reproduction of the photographs in this catalogue is prohibited without the prior written permission from Calfire Ltd.

CALFIRE are proud to announce that we acquired the supply of the highly acclaimed range of quality castings from Kingsworthy Foundry in the autumn of 2010.

The Premier quality castings, British Made fire baskets, fire dogs etc from the Kingsworthy range are detailed within pages 44-57 of this catalogue. These ancillary items however have been integrated within our existing ranges.

Traditional Fire Backs - up to 24" wide

CALFIRE are proud to announce that they acquired the supply of the highly acclaimed range of quality castings from Kingsworthy Foundry in the autumn of 2010.

These Premier quality castings, British Made fire baskets, fire dogs etc from the Kingsworthy range are detailed within pages 44-57 of this catalogue.

Where Premier range alternatives are available, these are cross referenced within the catalogue.

Traditional Fire Backs - up to 24" wide

With our range of traditional cast iron firebacks, there is something to fit the smaller fireplace opening through to the larger inglenook.

Most of the firebacks are copies of authentic originals, some of which date back to the seventeenth century, and are ideal for those trying to maintain the historical charm of an old inglenook.

Sizes range from 405mm (16") wide to the 1065mm (42") wide 'Large Royal Oak' fireback; probably the largest fireback now available within the UK.

Traditional Fire Backs - up to 30" wide

*Kingsworthy Foundry
traditional quality fireside
accessories for log and
coal burning fires, now
available exclusively to the
trade from CALFIRE*

The thickness of our firebacks vary from ½" to 2" according to size. All firebacks are painted black. To install simply lean the fireback against the rear of the fireplace. Some firebacks are still hand moulded and cast in much the same way as they have been for generations. Apart from the aesthetic value, firebacks prevent scorching of the rear brickwork and help to radiate heat - a point worth remembering when installing a gas log or coal effect fire as they are equally effective with this type of appliance as with the traditional natural log or coal fire.

Reeded Panels

*Kingsworthy Foundry
traditional quality
fireside accessories for
log and coal burning
fires, now available
exclusively to the trade
from CALFIRE*

Please note: The larger reeded panels detailed on this page are particularly heavy, therefore in the interests of Health & Safety we recommend 2/3 people are used to lift or move them.

K56

The above wood-panelled fireplace interior is lined with cast iron Reeded Panels and a 24" Swansnest basket supported by Barley Twist Dogs.

Individual sizes & weights are provided for guidance only; due to the manufacturing process the actual product may vary.

Cross section showing Reeded form

Reeded Panels are used where the complete interior of the fireplace is required to be lined, as is the case of the re-building of a Georgian fireplace, or when reproducing a "period style fireplace". A cast iron firegrate with integral small back should be used with this type of fireplace (as example above).

35138 W1220 H1015 (48x40") 145Kg
35139 W1525 H1015 (60x40") 156Kg

*Sizes approximate - please allow
12mm (1/2") tolerance.*

Traditional Firedogs

Firedogs are used as ornamental supports for Dog Grate/Baskets. Consideration should be given to the extra width required in a fireplace opening to accommodate the feet span of the dogs.

Cast Iron Dogs can, if preferred be used without a Dog Basket. Seasoned logs can be lent against the cross bars and burnt on the hearth base, providing there is a good draw in the chimney.

All Fire Dogs sold as pairs

The Caframo Ecofan[®] is a heat-powered fan designed to circulate the warm air created by a wood or gas stove. Improved warm air circulation results in greater comfort and less fuel consumption.

Benefits of all Ecofans:

- * Increases Your Comfort**
- * Costs Nothing to Operate**
- * Cuts Your Fuel Costs**
- * Safe & Silent**

Choose an UltraAir 810 or an AirMax 812 for a wood-stove or the BelAir 806 for the lower stovetop temperatures found on many Gas; Pellet or Contemporary stoves.

812 AirMax
with Black
Blade shown.

It is important to read and follow the instructions on the correct placement of the Ecofan[®] to ensure satisfactory long term use.

We recommend the use of our Stovetop Thermometer 14077; see page 84 for details.

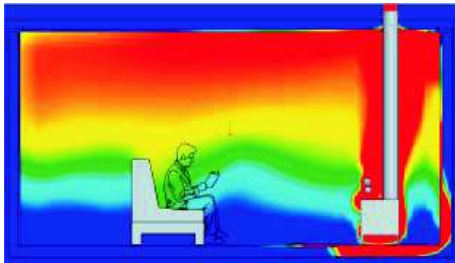

Full product details including technical, warranty and refurbishing service visit our product specific website at www.ecofan.co.uk

See page 75 for available spare parts.

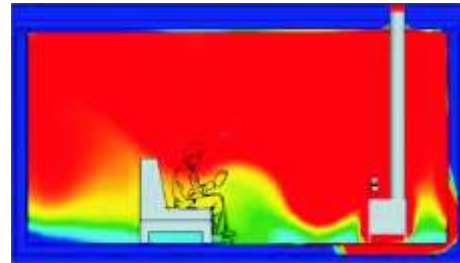

Increased Efficiency

Warm air is pushed out into the living area rather than just rising to the ceiling above the stove. This improves the heating effectiveness of the stove and results in greater room comfort as shown below.

Heat distribution without an Ecofan[®]

Heat distribution with an Ecofan[®]

Fuel Savings

Tests carried out in collaboration with a leading Canadian university has proved that using an Ecofan[®] results in fuel savings of up to 18%. For more information please visit our website at www.ecofan.co.uk

'No Fuss' Operation

The Ecofan[®] starts automatically and adjusts its speed with the stove temperature. As the stove heats up, the Ecofan[®] runs faster to move more warm air into the room. As the stove burns down and cools, the Ecofan[®] automatically shuts off.

Costs Nothing to Operate

Using the heat from the stove, the Ecofan[®] is the most economical way to effectively circulate warm air. No cables, plugs or batteries are required.

Unique Blade Design - Safe and Efficient

The unique Ecofan[®] blade is designed to deliver a broad cross section of gentle warm air movement to avoid uncomfortable drafts. The blade is our most efficient blade yet, moving more air at a wider range of stove temperatures. Complies with IEC 60335-2-80 safety standards.

For Optimum Performance of your Ecofan[®]

Placement of your Ecofan[®] on your stove top is critical. Be sure to position the Ecofan[®] on the stove so that cool air will be drawn over the 'cooling fins'. The Ecofan[®] should not be used directly in front of the stovepipe or at the front of the stove. Place the Ecofan[®] at the back edge of the stove as shown in the diagram. See the enclosed user manual for further tips on positioning the Ecofan[®] on your stove.

Make the Right Choice of Wood-Stove Ecofan[®]

	ULTRAIR	AIRMAX

*CFM = Cubic Feet (of Air) per Minute

**Time taken to reach 20°C from a cold start of 17°C in a standard test environment.

UltraAir: 76 minutes AirMax: 68 minutes No fan: 110 minutes

*** Temperature required to produce 50 CFM airflow.

UltrAir 810 Wood-Stove Ecofan[®]

The Caframo UltrAir Ecofan[®] 810 is a heat-powered fan designed to circulate the warm air created by a wood-stove operating with surface temperatures of between 100°C and 345°C. The Ultrair 810 Ecofan[®] generates up to 125 Cubic Feet (of Air) per Minute. (At 100°C the UltrAir Ecofan[®] 810 will move 50 CFM)

Dimensions: Base Plate W121 D76 (4.75x3"). H222 (8.75") from base to top of casting, excluding handle. Blade diameter 206mm (8")

Ecofan[®]

The UltrAir 810 replaced the Original 800 Ecofan[®] in 2012.

The new unit moves considerably more air than its predecessor across all temperature ranges.

Which unit do you need? See page 73 for a list of benefits of the 810 and 812.

It is important to read and follow the instructions on the correct placement of the Ecofan[®] to ensure satisfactory long term use and that your stove is working within the temperature range of 'best operation'. We recommend the use of our Stovetop Thermometer 14077; see page 84 for details.

AirMax 812 Wood-Stove Ecofan[®]

The Caframo AirMax Ecofan[®] 812 is a heat-powered fan designed to circulate the warm air created by a wood-stove operating with normal surface temperatures of between 85°C and 345°C. The AirMax Ecofan[®] 812 generates up to 175 Cubic Feet (of Air) per Minute. (At 85°C the AirMax Ecofan[®] 812 will move 50 CFM)

Dims: Base Plate W121 D82 (4.75x3.25"). H248 (9.75") from base to top of blade, excluding handle. Blade diameter 232mm (9")

Ecofan[®]

The AirMax 812 replaced the AirPlus Ecofan[®] in 2011.

The new unit moves considerably more air than its predecessor across all temperature ranges.

Which unit do you need? See page 73 for a list of benefits of the 810 and 812.

BelAir 806 GA Low Temperature Stove Ecofan[®]

The Caframo BelAir Ecofan[®] 806 GA is a heat-powered fan designed to circulate the warm air created by low temperature stoves operating with normal surface temperatures of between 75°C and 200°C. The BelAir Ecofan[®] generates up to 140 Cubic Feet (of Air) per Minute. (At 75°C it will move 50 CFM). The BelAir Ecofan[®] must not be used on a wood-stove or where the surface temperature exceeds 200°C.

Dims: Base Plate W162 D61 (6.4x2.4"). H241 (9.5") from base to top of blade. Blade diameter 232mm (9")

BelAir Ecofan[®]

The BelAir 806GA replaced the 806GS Ecofan[®] in 2013.

The new unit moves considerably more air than its predecessor across all temperature ranges.

We recommend the use of our Stovetop Thermometer 14077; see page 84 for details.

Spare Parts for Ecofans[®]

Replacement Motor and Blade Kits are available for the Ecofans as detailed below. Unfortunately we are unable to offer for sale thermo-electric modules as their replacement is a controlled process involving strict torque settings. If you believe the module has failed you are welcome to send your unit to CALFIRE who will quote you accordingly. Please note that we will only sell Ecofan[®] spare parts for use on original Ecofans[®]; not for any other purpose.

Motor Replacement Kits

After much usage an Ecofan[®] motor can wear out. Motor Replacement Kits are available for customers who wish to install a new motor rather than sending the old unit back to CALFIRE for repair, or purchasing a new Ecofan[®]. The replacement task is straight forward; however on some older models the consumer must have the capability to solder the new motor to the existing wires. The replacement kit comprises a new motor, an Allen/hex key to remove the blade and full instructions.

- ES001 800 Original, 802 AirPlus or 806GS (Soldering Type)
- ES006 800 Original, 802 AirPlus or 806GS (Push-On Type)
- ES009 810 UltraAir, 812 AirMax or 806GA BelAir (Push-On Type Only)

Blade Replacement Kits

Replacement blade kits comprise of; a new blade, a motor shaft securing grub screw, an allen/hex key to remove and refit the blade and full instructions. Please note that you cannot interchange blades between model types as they have different dimensions and rotate in different directions..

- 800 Original
- ES003 - Nickel
- ES002 - Gold

Stove Bright™ Paint

Colour Charts are available on request

Stove Bright™ High Temperature Paint

Stove Bright High Temperature Paint is a high quality, fast drying, high temperature paint for use on wood stoves, pipes, boilers, furnaces, flue pipes, ovens, engines, manifolds, barbecues and cast iron chimineas etc.

It can be used on any steel product with extreme surface temperatures up to 650°C and is ideal for touching up ceramic coals.

Unique in offering 3 'blacks' and a range of over 30 colours, Stove Bright is used by many of the leading stove manufacturers as their factory finish.

Stove Glass & Mica
season 2013/2014

Stove Glass Panels, Strips & Mica

CALFIRE STOCK SIZES FOR ALL POPULAR STOVE MANUFACTURERS

Panels

Calfire Panels are manufactured from the finest quality zero thermal expansion rated ceramic glass. Sizes are available from stock for all leading stoves and our in-house cutting facility means any size and shape can be quickly supplied to order.

Strips

Replacement Strips are supplied from the highest quality flat borofloat sheet. Calfire have Strips to suit the majority of stoves on the market and can supply specials with a rapid response guaranteed.

Mica

Ready cut stove panels and standard sheets are available

See price list for details

WE CAN CUT SPECIAL SIZES & SHAPES OF GLASS PANELS INCLUDING STRIPS AND MICA

WE RECOMMEND WHEN REPLACING A NEW GLASS PANEL TO ALSO REPLACE THE THERMAL ROPE SEAL.

PLEASE REFER TO PAGE 78-79.

FOR CLEANING AND RESTORING YOUR GLASS PLEASE REFER TO PAGES 85 -86.

Glass panels, glass strips and mica are supplied skin packed to display on euro-hooks. All size information provided in good faith, please ensure correct requirements are specified.

Please contact us for prices on any special sizes.

Calcowl Anti-Downdraught Cowl

CALCOWL ANTI-DOWNDRAFT COWL 14025

Calcowl has solved many of the problems caused by downdraft, thus helping to provide a cleaner fresher environment within the home. It is suitable for all types of fireplaces; oil, gas and solid fuel boiler systems.

Calcowl ensures a more evenly controlled draw that can lead to improved fuel consumption. Use of the Calcowl reduces the risk of fire by greatly reducing the build up of tarry soot inside the flue system. The product is manufactured using top quality acid resistant stainless steel, is maintenance free, easy to fit, silent, effective and fits most chimneys with a maximum external diameter of 255mm (10").

Mini EuroCowl Static Anti-Downdraught Cowl

Designed to cure smoky fireplaces. Prevents down-draughts by creating a positive airflow whatever the wind direction. Fits flue sizes 125mm to 250mm internal diameter. Also prevents birds, vermin and rain entry. Suitable for all fuels, remove bird guard when used with solid fuel to prevent clogging. Supplied fully assembled and ready to fit.

Maintenance: High dome allows for effective sweeping in situ.

Approvals: BS/EN 1856-1 2009

Accessories: 316 grade Adaptor Plate to allow fitting to flexible flue liner or rigid liner/free standing metal flue; Can also be fitted direct to the Euro Pot Hanger (125 and 150mm) and the Euro Twinwall adaptor (150mm). See Price List for details.

The Aluminium Mini EuroCowl is supplied with a mesh birdguard and is suitable for all locations using gas, oil or coal.

The Stainless Steel version does not include the mesh birdguard. It is suitable for all locations using all fuel types including coal & smokeless coal. If required a stainless steel mesh birdguard can be ordered as a separate item; see Price List for details.

Euro Topguard Bird/Rain Guard

Designed to prevent birds, vermin and leaves entering chimney flues whilst maintaining flue efficiency. Provides good ventilation and added protection against wind and rain entry.

Accessories: This model can be used in conjunction with Pot Hangers, Twinwall Adaptor or the Adaptor Plate. See Price List.

Maintenance: The high dome allows for effective sweeping without the need to remove the cowl from the chimney pot.

Sizes: Fits pots from 125mm (5") to 250mm (10")

Approvals: BS5871 (terminals up to 250mm (10").

The Mild Steel (zinc primed and powder coated) Topguard is suitable for inland locations using gas, oil or coal.

The Stainless Steel version is suitable for both inland and coastal locations using all fuel types including coal & smokeless coal.

Peek

Developed for professionals and demanded by those who have tried it, Peek is a 4-in-1 cleaner that cleans, polishes, restores and protects 38 surfaces including brass, copper, stainless steel, silver, gold, chrome, fibreglass, ceramics, glass, acrylics and painted surfaces. When The Royal Yacht Britannia was in service everything on board, from the Royal George Binnacle to each piece of silver, was kept in pristine condition by the Yachtsmen using Peek Polish. This resulted in the products manufacturer being awarded the Royal Warrant in 2005.
